

SkillTest Indonesia Technical Handover Preview

Portfolio-safe summary prepared for public review. The full internal handover is not included in this preview.

Public Preview Scope

This preview demonstrates Marc Angelo Mendoza's technical documentation approach without exposing private credentials, environment files, admin access steps, internal account details, or sensitive deployment records.

Area	Preview Detail
Project	SkillTest Indonesia - medium client platform
Public URL	https://skilltestindonesia.com/login
Frontend scope	React + TypeScript + Vite, with some JavaScript where applicable
Backend/data scope	Firebase Firestore and Storage as the NoSQL backend
Deployment scope	GitHub source control and Hostinger deployment flow
Related portfolio project	Human Capital Management System: https://assessmenthcmsystem.onrender.com/login

What the Full Handover Covers

- Source-of-truth repository workflow and production branch expectations.
- Hostinger deployment checklist, build output notes, domain, SSL, and route handling.
- Firebase Firestore/Storage configuration checklist, security rules review, authorized domains, and backup responsibility.
- Environment variable conventions, including keeping real secrets out of GitHub and public documentation.
- Maintenance and sign-off checklist for releases, backups, access review, and handover acceptance.

Privacy and Security Redactions

Not included in this preview	Reason
Passwords, tokens, service-account files, or .env values	Protects credentials and project ownership
Live admin credentials or reset procedures	Prevents unauthorized access
Private deployment/account screenshots	Avoids exposing client infrastructure
Internal-only notes and confidential client details	Keeps the preview portfolio-safe

Portfolio Positioning

This preview is intended to show that Marc can create clear post-launch documentation for developers, client teams, and project owners. It highlights documentation discipline, deployment awareness, security thinking, and practical handover organization.

Prepared as a preview artifact for Marc Angelo Mendoza's web development and executive VA portfolio.
